The use of flower essences it has been said goes back to the ancient lands of Atlantis (basically around the Atlantic Ocean) and Lemuria (around the Pacific Ocean), and that some Lemurians remained on Earth as etheric beings, devas of the plant kingdom.

The Omega Essences are vibratory essences created in co-operation with the life force of the plant, the nature spirits, Angelic Beings, the energies of earth, fire, water and air, and other dimensional energies, and serve our return to completeness in our world. Each Omega Essence has a message from the etheric being involved in the creation of it.

When each Essence has served its purpose and meets no more resistance, it stops working, and when all have completed their purpose, you realise you have forgotten to take them!
