## OMEGA ESSENCES

The use of flower essences it has been said goes back to the ancient lands of Atlantis (basically around the Atlantic Ocean) and Lemuria (around the Pacific Ocean), and that some Lemurians remained on Earth as etheric beings, devas of the plant kingdom.

The **Omega Essences** are vibratory essences created in co-operation with the life force of the plant, the nature spirits, Angelic Beings, the energies of earth, fire, water and air, and other dimensional energies, and serve our return to completeness in our world.

You already are Perfect. The Omega Essences help you to reveal and to Be that Perfect Universal Being that you are, here on Earth to fulfil your Purpose. Whenever you feel unhappy, unworthy, insecure, low in physical energies through whatever cause, the Omega Essences can help bring you back to happiness and health - your natural state of being. They will work through your relationships, career, health issues, clearing the blockages and negativity.

Healing can take place of present, past and future conditions, as well as furthering your search for expanded consciousness and awareness, assisting you to be clear and fully connected with Creative Source. They can be used alone as a therapy or in conjunction with other forms of healing whether that is through the medical system or the alternatives recognised as healing modes.

During 1999 the importance of flower essences to assist us in this period became apparent to me and I was prompted to make up the Mother and Stock bottles which comprise Omega Essences.

I followed the method of asking permission of the flowers themselves and the etheric beings working with the flowers and so a relationship was established on an etheric level.

As my work progressed there were new essences created by Beings of Light to be included in the range.

All of these essences work to restore harmony to our vibrations, to clear blockages in our energy fields and so allow us to be the Light Beings that we truly are, in our true essence.

I am in awe of the influences at work to bring them into being.

I feel honoured and blessed to have received this information on the effects of these essences and to share them with you.
