

OMEGA ESSENCES

The use of flower essences it has been said goes back to the ancient lands of Atlantis (basically around the Atlantic Ocean) and Lemuria (around the Pacific Ocean), and that some Lemurians remained on Earth as etheric beings, devas of the plant kingdom.

The **Omega Essences** are vibrational essences created in co-operation with the life force of the plant, the nature spirits, Angelic Beings, the energies of earth, fire, water and air, and other dimensional energies, and serve our return to completeness in our world.

You already are Perfect. The Omega Essences help you to reveal and to Be that Perfect Universal Being that you are, here on Earth to fulfil your Purpose. Whenever you feel unhappy, unworthy, insecure, low in physical energies through whatever cause, the Omega Essences can help bring you back to happiness and health - your natural state of being. They will work through your relationships, career, health issues, clearing the blockages and negativity.

Healing can take place of present, past and future conditions, as well as furthering your search for expanded consciousness and awareness, assisting you to be clear and fully connected with Creative Source. They can be used alone as a therapy or in conjunction with other forms of healing whether that is through the medical system or the alternatives recognised as healing modes.

MESSAGE TO YOU FROM THE HIGHER CONSCIOUSNESS ~

"We come to establish the restoration of the correct energy pattern for you so that you are enlivened and uplifted and you are in a state of happiness and well being.

As part of the process you may experience the energy working throughout you as heat or coolness or rippling movement in parts of the body as we connect energy channels which need repairing, or untangle areas of confused energy patterns.

We may need to assist you clear energy patterns from other times or recent occurrences to enable you to be functioning in the present without fear.

We will bring to you the vibrations to restore you to your natural state of being during the process of the treatment and support you during your changes.

Your experience and needs are unique to you and so the experience cannot be defined.

It will be our honour to work with you."

In its natural state the body is a flowing field of energy patterns and when the entire energy field is clear and working in balance and harmony, the person is glowing with health, vitality, creativity and happiness.

If you are not feeling like this, then come and see me for clearance of the blockages and resistances in your energy field, whether you know the cause or not. I have had many years training and working in channelling and energy healing work.

If you are receiving medical treatment you can benefit through this process by receiving energy to speed your return to health.

Practitioners working in their own particular healing modalities also benefit in their own work through these healing sessions, which can strengthen your connection and alignment with your own Super Consciousness, allowing greater clarity and awareness.

Allow an hour for each visit for the vibrational healing and discussion and to allow the creation of a vibrational essence for you to take to continue the healing, if necessary.

Heal - to make whole - to restore health - to make well - to become sound.

PERSONAL CONSULTATIONS

You can order a personal message, for spiritual information and guidance for you at this time. I like to call them energy journeys, because the light beings who will come to you will surely uplift you and wrap you up in their loving support, and they have been waiting for the opportunity to connect with you in this way. The light beings who come can be in the form of spirit guides, Angelic messengers, or from other planetary dimensions - whatever is needed for you right now - and they will give you insight into the higher aspects of your life.

While every message can serve to bring you into clearer light-energy, Your Personal Message is different to the Omega Healing Energy Consultation which is specifically for healing.
